EVOLine® Plug

Where ever there is a shortage of space or a secure connection is not available, EVOLine® Plug makes its appearance.

EVOLine® Plug – easier and slimmer than ever before.

Safety plug

Easy handling and
senior citizens friendly

The plug module „EVoline® Plug“ distinguishes itself by two innovations:

- firstly by its very small construction height which makes it possible that pieces of furniture in front of a socket can be positioned almost flush with the wall and therefore can be placed more flexibly within a room

- secondly by its movable plug face. Due to this mobility although the plug is secure in the socket, very little force is necessary when pulling the plug out of the socket. This is enabled because the EVoline® Plug levers itself out of the socket.

The practical design of this plug with lengthened grip element therefore allows an easy and effortless handling especially by elderly or disabled people.
